## **A report on “Coding in C”**

**Date: 10/12/2021**

### **Introduction:**

It is designed to introduce participants to the fundamental principles and practical applications of programming in the C language. As one of the oldest and most influential programming languages, C serves as the backbone for many modern programming languages and systems. This event aims to demystify C programming for both beginners and those looking to refine their skills, providing a structured yet engaging learning experience.

### **Objective:**

The primary objective of "Coding with C" is to equip participants with a solid understanding of C programming basics and to enhance their problem-solving abilities through coding exercises. By the end of the event, participants should be able to write, debug, and optimize simple C programs. The event also aims to highlight the relevance of C in various applications, including systems programming, embedded systems, and software development, thereby demonstrating the language's enduring significance in the tech industry.

### **Methodology:**

The event will employ a hands-on approach to learning, combining theoretical instruction with practical exercises. Participants will start with an overview of C programming concepts, including data types, control structures, functions, and pointers. This will be followed by interactive coding sessions where attendees can apply these concepts in real-time, working on problems and projects designed to reinforce their understanding. Experienced instructors will provide guidance, answer questions, and facilitate discussions to ensure that all participants can follow along and make the most of the learning experience.

## Outcome:

By the conclusion of "Coding with C," participants will have gained a foundational knowledge of C programming and developed the confidence to tackle basic coding challenges. They will be able to understand and write C code with greater proficiency, troubleshoot and debug issues, and appreciate the practical applications of C in various fields. Additionally, participants will leave with resources and a clearer pathway for further study, empowering them to continue their programming journey and explore more advanced topics in C and beyond.
