BRIEF INFORMATION ABOUT THE ACTIVITY

TITLE OF THE ACTIVITY	Software Testing Using Selenium
OBJECTIVE	<p>Objective: Implement automated regression tests to quickly and reliably validate that new changes have not adversely affected existing functionality.</p> <p>Test Scripts: Develop and maintain test scripts for critical workflows and functionalities.</p> <p>Test Suites: Organize tests into suites to cover various aspects of the application.</p> <p>Continuous Integration: Integrate Selenium tests with CI/CD pipelines for automated execution.</p> <p>Objective: Verify that web applications perform consistently across different browsers and versions to ensure a uniform user experience.</p>

<p>DESCRIPTION</p>	<p>Software Testing Using Selenium by Mr. Nikhil Jain CS provides an in-depth understanding of automated testing practices with Selenium, covering test case creation, execution, and debugging.</p> <p>The training equips participants with practical skills to ensure software quality and reliability through hands-on exercises and real-world scenarios.</p>
<p>OUTCOME</p>	<p>Faster execution of tests compared to manual testing, leading to quicker feedback and more efficient development cycles.</p> <p>Parallel Execution: Selenium allows tests to be run in parallel across multiple browsers or environments, reducing overall test execution time.</p> <p>Reduced Human Error: Automated scripts reduce the likelihood of errors that can occur with manual testing</p>

BRIEF INFORMATION ABOUT THE ACTIVITY

TITLE OF THE ACTIVITY	Science and Technology using AI&ML
OBJECTIVE	<p>Objective: Utilize AI and ML to speed up the process of scientific discovery and research by analyzing large datasets, identifying patterns, and generating insights.</p> <p>Data Analysis: Apply ML algorithms to analyze complex scientific data, such as genomic sequences or astronomical observations.</p> <p>Predictive Modeling: Use AI to predict outcomes and model complex systems in fields like climate science, physics, or materials science.</p>

<p>DESCRIPTION</p>	<p>Science and Technology using AI & ML by Dr. Ezhilavan delves into how artificial intelligence and machine learning can transform scientific research and technological advancements.</p> <p>The course covers cutting-edge techniques and real-world applications, equipping participants with the skills to harness AI and ML for solving complex problems and driving innovation in various scientific and technological fields</p>
<p>OUTCOMES</p>	<p>Significant speed-up in the process of scientific research and discovery, leading to faster identification of new phenomena and advancements.</p> <p>Faster Data Analysis: AI can analyze large datasets more quickly than traditional methods, uncovering patterns and correlations.</p> <p>Enhanced Research Capabilities: Automated data collection and analysis streamline the research process, leading to new insights and discoveries.</p>

COMPANY PROFILE:

Objective:

The word "VEI" comes from the Norwegian Language which means "Way/Path/Road". The goal behind the company is to pave a road to the technological future while digitalizing the future by leveraging the power of Blockchain.

Career Areas:

We are a Software & Blockchain Development company providing solutions globally. We are Blockchain Experts & Web3 Enthusiasts, who have taken up the challenge of decentralizing every inch of existing and future technology development to meet the global demands. We provide scalable, transparent, and robust Services & Solutions in the latest technology - all in one place.

Dr. Ezhilavan,

Founder & CEO
