BRIEF INFORMATION ABOUT THE ACTIVITY

TITLE OF THE ACTIVITY	EVENT-DRIVEN ARCHITECTURE IN DEVOPS
OBJECTIVE	<p>Understanding Event-Driven Architecture (EDA): Concepts and Principles: Define Event-Driven Architecture and its key components (events, event producers, event consumers, event brokers). Explain how EDA differs from traditional architectural styles and its advantages in a DevOps context.</p> <p>Integration of EDA with DevOps Practices: Automation and Continuous Integration/Delivery: Explore how EDA can enhance CI/CD pipelines by automating deployments, tests, and other processes based on events.</p>

<p style="text-align: center;">DESCRIPTION</p>	<p>Dr. S. Sankar 's session on "Event-Driven Architecture in DevOps " focused on scalability, responsiveness, and flexibility in software systems</p> <p>He emphasized on Event-Driven Architecture which enhances various aspects of DevOps by providing real-time processing, scalability, fault tolerance, flexibility, and automation, all of which are critical for modern software development and operations</p>
<p style="text-align: center;">OUTCOMES</p>	<p>Conceptual Understanding: Participants will be able to clearly define Event-Driven Architecture and explain its core components (events, producers, consumers, brokers).</p> <p>Comparison with Traditional Architectures:</p> <p>Participants will understand how EDA contrasts with and improves upon traditional architectural styles.</p>

BRIEF INFORMATION ABOUT THE ACTIVITY

TITLE OF THE ACTIVITY	Workshop on Machine Learning using Python
OBJECTIVE	<p>Understanding the Basics: Define machine learning and its relationship to artificial intelligence and data science. Overview of different types of machine learning: supervised, unsupervised, and reinforcement learning.</p> <p>Getting Started with Python for ML: Install and configure Python, Jupiter Notebook, and relevant libraries.</p> <p>Basic usage of libraries like pandas for data manipulation, and Matplotlib/Seaborn for data visualization.</p> <p>Data Preparation and Exploration: Import datasets and handle missing values. Explore and preprocess data.</p>

<p>DESCRIPTION</p>	<p>Mr. K. Ayyappan session on " Workshop on Machine Learning using Python" focused on Python's extensive ecosystem of libraries and frameworks that simplify the process of building and deploying ML models.</p> <p>He emphasized on Python's rich ecosystem and how it provides tools for nearly every aspect of the machine-learning pipeline, making it an excellent choice for data scientists and machine-learning practitioners.</p>
<p>OUTCOMES</p>	<p>Understanding Fundamental Concepts: Participants will have a clear grasp of basic machine learning concepts, including different types of machine learning (supervised, unsupervised, reinforcement learning) and key terminologies (e.g., features, labels, training, testing).</p> <p>Proficiency in Python for ML: Participants will be able to use Python for basic data manipulation and analysis. They will be familiar with essential libraries such as NumPy, pandas, and Matplotlib/Seaborn, and understand how to use them to prepare and visualize data.</p>

COMPANY PROFILE:

Sea6 Energy was built on the vision of sustainably and ethically harnessing the oceans to build a future for mankind independent of traditional energy sources.

Conceptualised by a team of PhDs in engineering, agriculture and biotechnology, Sea6 Energy was formed to develop renewable energy solutions to utilize the potential of the ocean to develop eco-friendly land alternatives.

Mission:

Harnessing the world's oceans to create environmentally sustainable, commercially viable products and solutions that improve agriculture and food production, mitigate global warming, create bio-degradable replacements for plastics and replace fossil fuels as a source of energy and chemicals

Vision:

Disruptive solutions sustainable.
