City Engineering College
Bangalore

Sub: Regarding Permission to conduct a Value – Added Course on Elite Aptitude
Enhancement: Mastering Verbal and Non-Verbal Skills

Respected Sir,

We would like to conduct a Value - Added Course on “**Elite Aptitude Enhancement: Mastering Verbal and Non-Verbal Skills**” for second year students from 6/5/2024 to 11/5/2024. It is a transformative course designed to elevate communication abilities. This course equips participants with advanced techniques for articulating ideas clearly and confidently in various professional settings. By honing non-verbal cues, such as body language and facial expressions, attendees can enhance their overall communication impact. The curriculum includes practical exercises and real-world scenarios, ensuring participants can apply their skills effectively. So, I request you to permit us to conduct this course. Kindly do the needful.

Yours Sincerely

HOD
Department of CSE

ABOUT COLLEGE

City Engineering College, Bangalore affiliated to Visvesvaraya Technological University (VTU) is centrally located in Bangalore. The College has expanded over the last 19 years with sophisticated infrastructure as a part of the Institution's commitment to provide higher quality education in the area of Engineering. The highly facilitated landmark building – provides a perfect ambience for creativity and learning. City Engineering College is known for its academic excellence, friendly welcoming atmosphere and community spirit. Over large number of full time students study here in a wide range of programs. It is a centre of talented, experienced teachers who inspire and energize the students to achieve the best.

ABOUT THE DEPARTMENT

The Department of Computer Science & Engineering was started in the year 2001 is known for imparting Quality education and carrying out cutting edge research. In addition to the UG program, PG CSE program and Research facilities for Ph.D. The department offers undergraduate program and has a comprehensive curriculum on topics related to software and hardware with an emphasis on theoretical and practical learning. It has well equipped, state of the art laboratories supported by highspeed Internet and wireless networks.

ABOUT RESOURCE PERSON

Prudhvi Raj, an experienced aptitude and soft skills trainer with a background in mechanical engineering and psychology, excels in teaching with a focus on individual student needs, effective communication, and problem-solving. He has trained students and professionals across over 150 colleges and various institutions in India, specializing in quantitative aptitude, logical reasoning, recruitment essentials, and soft skills. Known for his engaging teaching style and leadership abilities, Prudhvi is passionate about nurturing young talent and enjoys working in diverse environments.

ABOUT THE COURSE

Elite Aptitude Enhancement: Mastering Verbal and Non-Verbal Skills is a comprehensive program designed to boost proficiency in both spoken and written communication. It emphasizes vocabulary expansion and the precise use of grammar to ensure clarity and accuracy in expression. The course also focuses on critical thinking and logical reasoning, equipping participants with the skills to analyze and solve complex problems effectively. Additionally, it includes training in data interpretation, enabling individuals to understand and draw insights from various data sets. This intensive program aims to foster academic and professional success by enhancing essential verbal and non-verbal skills.

COURSE OUTCOMES

- Enhanced verbal and non-verbal communication skills
- Improved vocabulary and grammar usage
- Strengthened logical reasoning and problem-solving abilities
- Effective self-assessment and goal-setting techniques
- Consistent practice and progress tracking habits
- Increased proficiency in academic and professional contexts
- Preparation for real test conditions through mock tests
- Development of lifelong learning strategies and personal growth habit

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING VALUE ADDED COURSE SYLLABUS

Course Name: Elite Aptitude Enhancement: Mastering Verbal and Non-Verbal Skills

Duration: 30 hours

Course Objectives:

- Develop a diverse and extensive vocabulary through targeted learning strategies.
- Master essential grammar rules to enhance writing and speaking clarity.
- Apply active reading techniques to understand and analyze complex texts.
- Develop critical thinking skills to evaluate arguments and identify logical patterns.
- Improve spatial visualization and proficiency in interpreting graphical data.

Module	Topic
Module 1: Introduction	<p>Course Overview: Introduction to course objectives and structure. Importance of verbal and non-verbal skills in academic and professional settings. Initial self-assessment exercise.</p> <p>Self-Assessment: Conducting a comprehensive self-assessment to identify current strengths and areas for improvement. Setting personal goals for the course. Diagnostic tests and goal-setting worksheet.</p>
Module 2: Verbal Aptitude	<p>Vocabulary Building: Strategies for expanding vocabulary (contextual learning, mnemonics, word roots). Tools for learning new words (flashcards, vocabulary apps). Activities: Flashcards creation, vocabulary quizzes, word usage exercises.</p> <p>Grammar and Usage: Detailed study of essential grammar rules (syntax, punctuation, sentence structure). Common grammatical errors and how to avoid them. Activities: Grammar exercises, proofreading and editing practice, writing assignments.</p>

Resource Person Profile

Prudhvi Raj is a highly qualified and experienced aptitude and soft skills trainer with a background in mechanical engineering from GITAM University, Hyderabad, and a postgraduate degree in psychology. He has a strong passion for teaching and has honed his skills in dynamic educational settings. Prudhvi is noted for his organizational abilities, drive, and effectiveness in teaching, with a particular focus on individual student needs. He has a diverse skill set that includes excellent communication, teamwork, interpersonal relations, and problem-solving abilities, which he has developed through various academic and work experiences.

Prudhvi has extensive experience in training students and professionals across a wide range of institutions, including colleges, corporate offices, and NGOs. He has worked with over 150 colleges and has been involved in training sessions across multiple states in India. His expertise includes quantitative aptitude, logical reasoning, recruitment essentials, and soft skills. He is known for his engaging teaching style and his ability to convey concepts in an interesting and impactful manner.

Prudhvi's leadership and teamwork skills have been developed through his involvement in sports, community development, and voluntary work. He is also a good motivator and listener, with a keen sense of intuition and timing, which he uses to support and develop the talents of others. His interests include training and interacting with young talent, as well as traveling and experiencing new cultures and languages. He enjoys working in different environments and is committed to his role as a trainer.

21. What is the goal of the Consistent Practice session in Module 4?
 - a) Expanding vocabulary
 - b) Establishing a routine for regular practice**
 - c) Conducting initial self-assessment
 - d) Studying essential grammar rules

22. Which activity is part of the Consistent Practice session in Module 4?
 - a) Timed quizzes
 - b) Reflection journals**
 - c) Grammar exercises
 - d) Logical puzzles

23. What is the purpose of the Mock Tests session in Module 4?
 - a) To learn new grammar rules
 - b) To assess progress and identify areas for improvement**
 - c) To create flashcards
 - d) To establish weekly practice goals

24. What is the primary focus of the Career and Academic Skills session in Module 5?
 - a) Recognizing patterns and sequences
 - b) Applying verbal and non-verbal skills in academic and professional contexts**
 - c) Conducting initial self-assessment
 - d) Studying essential grammar rules

25. What is the goal of the Lifelong Learning session in Module 5?
 - a) Developing habits for continuous learning and personal growth**
 - b) Solving logical puzzles
 - c) Conducting vocabulary quizzes
 - d) Breaking down problems into manageable steps

FIG 1: FEEDBACK ANALYSIS

Course Outcomes:

1. Broadened Vocabulary: Use an expanded vocabulary effectively in both written and verbal communication.
2. Grammatical Proficiency: Demonstrate accurate use of grammar in various forms of communication.
3. Advanced Reading Comprehension: Comprehend and interpret complex texts with greater efficiency and accuracy.
4. Enhanced Logical Reasoning: Solve logical problems and puzzles with improved accuracy and speed.
5. Improved Spatial and Data Skills: Visualize spatial relationships and interpret data from graphs and charts accurately.

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

VALUE ADDED COURSE

A five-day Value-Added Course on **Elite Aptitude Enhancement: Mastering Verbal and Non-Verbal Skills** was organized by the Department of Computer Science and Engineering from 6th to 11th May 2024 for Computer Science and Engineering students in the seminar hall by **Mr. Prudhvi Raj, Freelance aptitude and soft skills trainer**.

The event began with a formal inaugural function. **Dr. S Karunakara, Principal CEC, Dr. Narayanaswamy, Vice Principal and HOD of CSE** were present during the inauguration. The program began by seeking the blessings of Almighty with invocation and lighting of lamp. Principal advised the students to utilize the benefits of the course completely. **Dr. Sowmya Naik** welcomed the resource person and gave a course overview. Later the session was handed over to the speaker.

FIG 2: COURSE INTRODUCTION BY SPEAKER

On the first day, the course commenced with an introduction to its objectives, structure, and the significance of mastering verbal and non-verbal skills. Participants engaged in discussions to understand the expectations and benefits of the course. Following this, a comprehensive self-

assessment was conducted to gauge participants' current skill levels, utilizing diagnostic tests and goal-setting exercises to establish personalized learning targets.

Day 2:

The focus on Day 2 was on enhancing participants' vocabulary and grammar skills. Effective strategies for expanding vocabulary were introduced, including mnemonic techniques and contextual learning. Practical exercises such as creating flashcards and applying newly learned words in sentences reinforced these strategies.

Day 3:

Day 3 centered on developing active reading and critical thinking abilities. Participants were guided through techniques for skimming, scanning, and summarizing texts to enhance reading comprehension. They tackled various types of texts, analyzing content critically and answering comprehension questions to deepen their understanding. The session also included exercises in argument analysis and debate simulations, fostering participants' ability to evaluate evidence and construct logical arguments.

FIG 3: STUDENTS SOLVING PUZZLE

Day 4:

The fourth day focused on honing logical reasoning and spatial awareness skills. Participants engaged in challenging logic puzzles and exercises designed to identify patterns and relationships. This was complemented by activities aimed at improving spatial visualization and manipulation, including 3D modeling tasks and geometric puzzles. These sessions aimed to strengthen participants' problem-solving capabilities and spatial reasoning abilities.

Day 5:

On the final day, the emphasis was on data interpretation and practical application of acquired skills. Participants learned to interpret and analyze data from graphs and charts, applying statistical concepts such as mean and median. Practical exercises and real-world applications provided opportunities for participants to integrate their verbal and non-verbal skills. The day concluded with mock tests simulating real-world assessments, providing valuable feedback and preparing participants for future challenges.

Throughout the intensive 5-day course, participants engaged in a structured and rigorous curriculum that effectively enhanced their verbal and non-verbal aptitude skills. By combining theoretical learning with practical application, the course equipped participants with essential skills for academic success, professional development, and standardized test preparation.

Sub: Regarding permission to conduct an Add-on Course on Innovative IoT Design

Respected Sir,

We would like to conduct an Add-on course on “**Innovative IoT Design**” for final year students from 26/02/2024 to 1/3/2024. The course on IoT Innovative Designs equips students with cutting-edge skills to design and develop Internet of Things (IoT) solutions. Through hands-on projects and real-world case studies, participants learn to integrate hardware and software components seamlessly. By staying current with industry trends, students gain insights into the latest advancements and applications of IoT technology. So, I request you to permit us to conduct this course. Kindly do the needful.

Yours Sincerely

Dr. Sowmya Naik P T

ABOUT COLLEGE

City Engineering College, Bangalore affiliated to Visvesvaraya Technological University (VTU) is centrally located in Bangalore. The College has expanded over the last 19 years with sophisticated infrastructure as a part of the Institution's commitment to provide higher quality education in the area of Engineering. The highly facilitated landmark building - provides a perfect ambience for creativity and learning. City Engineering College is known for its academic excellence, friendly welcoming atmosphere and community spirit. Over large number of full time students study here in a wide range of programs. It is a centre of talented, experienced teachers who inspire and energize the students to achieve the best.

CHIEF PATRON

Dr. K R Paramahamsa,
Chairman,
AMC-City - Brooklyn Group of institution

PATRONS

Dr. S Karunakara,
Principal, CEC

Dr. Narayanaswamy Ramaiah,
Vice Principal , CEC

CONVENER

Dr. Sowmya Naik PT,
HOD CSE & Executive Officer

COORDINATORS

Mr. G A Girish,
Assistant Professor,
Department of CSE

Mrs. Shruthi B S,
Assistant Professor,

About The Department

The Department of Computer Science & Engineering was started in the year 2001 is known for imparting Quality education and carrying out cutting edge research. In addition to the UG program, PG CSE program and Research facilities for Ph.D. The department offers undergraduate program and has a comprehensive curriculum on topics related to software and hardware with an emphasis on theoretical and practical learning. It has well equipped, state of the art laboratories supported by highspeed Internet and wireless networks.

About the Course

The "Advanced Entrepreneurship Skills" course is a meticulously designed value-added program aimed at bridging the significant gap between industry requirements and academic curricula. Tailored specifically for final year students, this course provides a robust foundation in entrepreneurial skills that are essential for the modern business landscape. By focusing on the development of innovative thinking, strategic planning, and effective problem-solving abilities, this program ensures that students are well-prepared to navigate the complexities of launching and managing successful ventures.

Course Outcomes

- Understanding IoT architecture .
- Applying design thinking principles for user-centric IoT solutions.
- Hands-on experience .
- Integration of IoT devices with cloud services, APIs, and web/mobile applications.
- Advanced IoT topics like edge computing, AI, and machine learning.

About Resource Person

Dr. Srinivasa Shetty is a Professor in the Department of Computer Science and Engineering at AMC Engineering College (AMCEC). He holds a Ph.D. and M.Tech in Computer Science and Engineering, and a B.E. in the same field. His research focuses on artificial intelligence, machine learning, data mining, big data analytics, computer networks, security, software engineering, and the Internet of Things (IoT).

He teaches courses on algorithms, operating systems, databases, networks, machine learning, and IoT. Dr. Shetty has held academic positions ranging from Assistant to Associate Professor before his current role. He has published numerous papers in reputed journals and conferences, and is a member of IEEE and ACM. His work has earned him several awards and he actively participate in professional service roles, such as journal reviewing and conference organizing. Outside of his professional commitments, he enjoys reading about emerging technologies and mentoring students.

CIRCULAR

Sub: Conducting a Add on Course on Innovative IoT Design

This is to inform all the concerned that a 5-day Add on Course on Innovative IoT Design by Dr. Srinivasa Setty, Professor, Department of CSE, AMCEC, has been organized from 26/2/2024 to 1/3/2024 for final year students. All the students have to participate compulsorily for the same. Attendance will be viewed strictly. All the students are hereby instructed to attend the session and get the maximum benefits.

Dr. Sowmya Naik P T

Add On Course "Innovative IoT Design"

Date: 26/2/2024 to 1/3/2024.

Schedule

Date	Session 1 (9.15 -11.15)	Session 2 (11:30-1:30)	Session 3 (2:00 -4:00)
26/2/2024	Overview of IoT: Definition, History, and Importance	IoT Architecture: Sensors, Connectivity, Data Processing, and Applications	Current Trends and Future Prospects; Case Studies of Successful IoT Implementations
27/2/2024	Introduction to Design Thinking: Principles and Process	Empathy: Understanding User Needs and Challenges	Ideation Techniques: Brainstorming, Mind Mapping, and Sketching; Prototyping and Testing: Creating Low-Fidelity Prototypes
28/2/2024	Sensors and Actuators: Types and Applications	Microcontrollers and Development Boards (Arduino, Raspberry Pi, etc.)	Connectivity Modules: Wi-Fi, Bluetooth, Zigbee, LoRa, etc.; Power Management for IoT Devices
29/2/2024	Setting Up Development Environments; Connecting and Configuring Sensors and Actuators	Building Simple IoT Projects; Troubleshooting Common Issues in IoT Prototyping	Introduction to IoT Programming Languages (Python, C, C++); Overview of IoT Platforms and Frameworks (Node-RED, ThingSpeak, etc.)
1/3/2024	Cloud Services for IoT: AWS IoT, Azure IoT, Google Cloud IoT	APIs and Web Services for IoT; Interfacing IoT Devices with Mobile and Web Applications	Case Study: Integrating IoT Solutions into Existing Systems; Edge Computing and Its Role in IoT

ADD ON COURSE SYLLABUS

Course Name: Innovative IoT Design

Duration: 30 hours

Course Objectives:

1. To provide participants with a foundational understanding of IoT, including its definition, history, architecture, and current trends.
2. To teach participants the principles and process of design thinking, enabling them to create innovative and user-focused IoT solutions.
3. To offer hands-on training with various IoT hardware components and software platforms, equipping participants with the skills to develop and prototype IoT projects.
4. To educate participants on integrating IoT devices with cloud services and applications, ensuring seamless operation and communication within IoT ecosystems.
5. To introduce participants to advanced IoT topics like edge computing, AI, and machine learning, and demonstrate their application in creating sophisticated IoT solutions.

	Topic
Module 1	Overview of IoT: Definition, History, and Importance; IoT Architecture: Sensors, Connectivity, Data Processing, and Applications; Current Trends and Future Prospects; Case Studies of Successful IoT Implementations Introduction to Design Thinking: Principles and Process; Empathy: Understanding User Needs and Challenges; Ideation Techniques: Brainstorming, Mind Mapping, and Sketching; Prototyping and Testing: Creating Low-Fidelity Prototypes
Module 2	Sensors and Actuators: Types and Applications; Microcontrollers and Development Boards (Arduino, Raspberry Pi, etc.); Connectivity Modules: Wi-Fi, Bluetooth, Zigbee, LoRa, etc.; Power Management for IoT Devices Setting Up Development Environments; Connecting and Configuring Sensors and Actuators; Building Simple IoT Projects; Troubleshooting Common Issues in IoT Prototyping

ASSESSMENT QUESTIONS

1. Which of the following is the most crucial step in the IoT design process?
 - a) Choosing the right microcontroller
 - b) Defining the problem and objectives**
 - c) Selecting a cloud service provider
 - d) Designing the user interface
2. What is the primary purpose of edge computing in IoT?
 - a) To replace cloud computing
 - b) To store data locally
 - c) To reduce latency and bandwidth usage**
 - d) To increase the cost of IoT devices
3. Which protocol is commonly used for IoT device communication?
 - a) HTTP
 - b) FTP
 - c) MQTT**
 - d) POP3
4. In an IoT system, sensors are primarily used to:
 - a) Process data
 - b) Store data
 - c) Collect data**
 - d) Transmit data
5. Which of the following is NOT a characteristic of an innovative IoT design?
 - a) Scalability
 - b) High energy consumption**
 - c) Security
 - d) Interoperability

6. What role does data analytics play in IoT systems?
 - a) It is used for controlling IoT devices
 - b) It helps in analyzing and making sense of the collected data**
 - c) It is used for wiring IoT sensors
 - d) It replaces the need for sensors in IoT

7. Which of the following technologies is often integrated with IoT for enhanced functionality?
 - a) Blockchain**
 - b) Manual data entry
 - c) Desktop computers
 - d) Traditional telephony

8. What is a primary advantage of using LoRaWAN in IoT systems?
 - a) High data rate
 - b) Short range
 - c) Low power consumption**
 - d) High power consumption

9. Which aspect of IoT design ensures that devices can communicate and work together seamlessly?
 - a) Autonomy
 - b) Interoperability**
 - c) Proprietary systems
 - d) Decentralization

10. In the context of IoT, what does "smart" typically refer to?
 - a) Devices that require manual intervention
 - b) Devices with embedded sensors and connectivity**
 - c) Devices that consume high power
 - d) Devices that are expensive

11. Which programming language is widely used for IoT due to its simplicity and large community support?
 - a) Java

b) Python

c) Ruby

d) Swift

12. Node-RED is best described as:

a) A cloud service for IoT

b) A programming language for IoT

c) **A flow-based development tool for visual programming of IoT**

d) A hardware platform for IoT

13. ThingSpeak is primarily used for:

a) Real-time operating system

b) **IoT data collection, storage, and analysis**

c) IoT device manufacturing

d) IoT security

14. What is the primary concern in IoT security?

a) Data redundancy

b) **Data privacy and protection**

c) Device cost

d) Network speed

15. Which cloud service is specifically designed for IoT?

a) Google Drive

b) **AWS IoT**

c) Dropbox

d) iCloud

16. Which platform provides IoT services under the Azure brand?

a) Google Cloud

b) IBM Cloud

c) **Microsoft**

d) Oracle Cloud

17. What is an API's role in IoT?

a) **To allow different software systems to communicate with each other**

b) To manufacture IoT devices

c) To visualize IoT data

-
- d) To provide hardware for IoT
18. Which of the following is not typically a feature of an IoT framework?
- a) Device management
 - b) Data analytics
 - c) Game development**
 - d) Connectivity protocols
19. What is the primary benefit of edge computing in IoT?
- a) Reduced device cost
 - b) Decreased latency and bandwidth usage**
 - c) Increased power consumption
 - d) Larger data storage
20. AI and Machine Learning in IoT applications are primarily used for:
- a) Analyzing and predicting data trends**
 - b) Data storage
 - c) Device manufacturing
 - d) Network setup
21. In the context of IoT, what does Industry 4.0 refer to?
- a) The first industrial revolution
 - b) The invention of the internet
 - c) The fourth industrial revolution characterized by smart and connected systems**
 - d) A new version of the internet
22. What is a key objective when defining project goals in IoT development?
- a) Maximizing project cost
 - b) Clearly identifying the problem to be solved**
 - c) Assigning all tasks to one person
 - d) Avoiding milestones
23. During project planning in IoT, why are milestones important?
- a) They increase project cost
 - b) They decrease project quality
 - c) They help track progress and ensure timely completion**
 - d) They are optional and rarely needed

24. What is the purpose of continuous development and testing in IoT projects?
- a) To reduce the number of team members
 - b) To identify and fix issues early and ensure quality**
 - c) To avoid updating the project
 - d) To increase project duration
25. What is an important step when preparing a presentation for an IoT project demonstration?
- a) Ensuring the project functions as expected and is well-documented**
 - b) Ignoring feedback from peers
 - c) Avoiding the use of visual aids
 - d) Focusing only on the project's failures

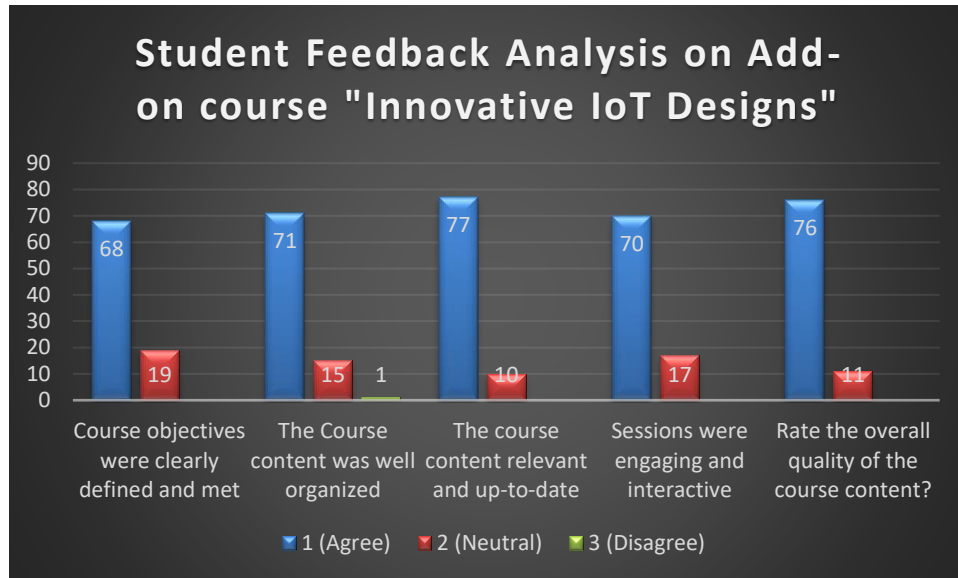

FIG 1: STUDENT FEEDBACK ANALYSIS

Outcomes

Participants were able to

- Gain a thorough understanding of IoT architecture, including sensors, connectivity, data processing, and applications.
- To apply design thinking principles to develop user-centric IoT solutions, focusing on empathy, ideation, prototyping, and testing.
- Acquire hands-on experience with IoT hardware (sensors, actuators, microcontrollers) and software (programming languages, IoT platforms), enabling them to build and troubleshoot IoT projects.
- Learn to integrate IoT devices with cloud services, APIs, and web/mobile applications, ensuring interoperability and scalability of IoT solutions

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

ADD ON COURSE

A five-day Add on Course on **Innovative IoT Design** was organised by the Department of Computer Science and Engineering from 26/2/2024 to 1/3/2024 for Computer Science and Engineering students in the project lab by Dr. Srinivasa Shetty, Professor, Department of CSE, AMCEC.

Day 1: Introduction to IoT and Design Thinking

On the first day, participants were introduced to the fundamental concepts of IoT, including its definition, history, architecture, and current trends. They explored case studies of successful IoT implementations to understand s real-world applications. In the afternoon, the focus shifted to design thinking. Participants learned about the principles and process of design thinking, emphasizing empathy to understand user needs and challenges. They engaged in ideation techniques such as brainstorming and mind mapping and created low-fidelity prototypes to test their ideas.

FIG 2: DR. SRINIVASA SETTY ADDRESSING STUDENTS

Day 2: IoT Hardware and Prototyping

The second day covered IoT hardware components, including various sensors, actuators, microcontrollers, and connectivity modules like Wi-Fi, Bluetooth, and Zigbee. Participants

ATTESTED COPY

gained hands-on experience by setting up development environments, connecting and configuring sensors and actuators, and building simple IoT projects. They also learned to troubleshoot common issues encountered during IoT prototyping.

Day 3: IoT Software Development and Integration

On the third day, the course focused on software development for IoT. Participants were introduced to IoT programming languages such as Python, C, and C++, and platforms like Node-RED and ThingSpeak. They learned about data collection, storage, analysis, and the importance of security and privacy in IoT. The afternoon session covered integration and interoperability, exploring cloud services like AWS IoT, Azure IoT, and Google Cloud IoT. Participants also learned about APIs and web services and examined a case study on integrating IoT solutions into existing systems.

Day 4: Advanced IoT Topics and Project Work

The fourth day began with advanced IoT topics, including edge computing, AI, machine learning in IoT applications, and IoT analytics and visualization tools. The participants also discussed IoT in Industry 4.0 and smart cities. In the afternoon, the focus was on project work and team collaboration. Participants defined their project goals and objectives, formed teams, assigned roles, planned milestones, and began the initial design and development of their projects.

Day 5: Final Project Presentations and Feedback

On the final day, participants continued developing and refining their projects in the morning. They focused on troubleshooting, optimizing their projects, and preparing for the final presentation. In the afternoon, participants presented their final projects, received peer and instructor feedback, and discussed future steps and learning paths. The course concluded with a wrap-up session and a Q&A.

By the end of the course, participants had gained a solid understanding of IoT systems' core components and architecture. They applied design thinking principles to create user-centric solutions, developed and prototyped IoT hardware and software, and integrated IoT devices with cloud services and mobile applications. They also implemented advanced concepts such as edge computing and AI and collaborated effectively on IoT projects, culminating in presenting their innovative solutions.

Sub: Requisition to conduct a Hands-on Skilling Workshop on Bits & Bytes of Networking using NS2

Respected Sir,

We would like to conduct A Hands-on Skilling Workshop on “Bits & Bytes of Networking using NS2” from 01-02-2024 to 7-02-2024 for 5th Semester students. The course is designed to bridge the gap between academic learning and industry practices it focuses on practical applications.

So, I request you to permit us to conduct this course and do the needful.

Yours sincerely

Dr. S Vagdevi

PATRONS

Dr. S Karunakara, Principal, CEC

Dr. Sowmya Naik, EO & Head, Dept. of CSE, CEC

Dr. S Vagdevi, Professor & Head CSE

COORDINATOR

Mrs. Nasrath B. K, Assistant Professor, Dept. of AIML

Resource Person

Dr. Deepthi V S
Assistant Professor,
Dept. of CSE (Cyber Security), DSCE

About College

CITY ENGINEERING COLLEGE

City Engineering College was established in the year 2001 under Jayanagar Education Society and located in Vasanthpura, Kanakapura Road, Bengaluru. The Campus has spread out in 12 acres of land with unique style of buildings.

The institution believes in providing high quality education to the prospective professionals of the country for which necessary quality benchmarks have been put in place, in the areas of faculty recruitment, development, training & placement, teaching process, student's grooming, external academic audits and feedback system for academic enhancement.

About Program

- Design and Simulate Network Topologies.
- Implement and Analyse Network Protocols
- Collect and Analyse Simulation Data Performance Evaluation and Optimization
- Apply Simulation Techniques to Real-World Networking Problems.

Next to Gokulam Apartment, Bangalore - 560 062.

Department of Artificial Intelligence and Machine Learning Academic Year: 2023-2024

Schedule for Hands-on Skilling Workshop on Bits & Bytes of Networking using NS2

Session 1 (9:00 – 11:00)	Session 2 (11:15 – 12:30)	Session 3 (1:30 PM - 2:30 PM)	Session 4 (2:30 PM - 3:30)	Session 5 3:30 PM - 4:30 PM
Day 1				
Introduction	Physical Layer	Implement Three nodes point – to – point network	error detecting code using CRC-CCITT (16- bits).	Practical
Day 2				
Introduction to data link layer	Implement transmission of ping messages/trace route over a network topology	continued	find the shortest path between vertices using bellman-ford algorithm	Practical.
Day 3				
The Network Layer	Implement an Ethernet LAN using n nodes and set multiple traffic nodes and plot congestion window for different source / destination	Routing Algorithms,	Congestion Control Algorithms	Practical
Day 4				
The Transport Layer:	Congestion control	Internet transport protocols.	continued	Practical
Day 5				
Application Layer:	The Web and HTTP	DNS-The Internet's Directory Service	continued	Course wrap-up

Resource person Profile

Dr Deepthi V S is a Asst. Professor in the Department of Computer Science and Engineering at Dayananda Sagar Engineering College. She holds a Ph.D. and MTech. in Computer Science and Engineering, and a B.E. in the same field. Her research focuses on computer networks, cyber security. she has published numerous papers in Cloud Density Estimation and location prediction, Behavior's Analysis and Detection of Blackhole, Multiphase Detection Evaluation of AODV, Analysis of wormhole Intrusion Attacks in MANETS, Enhanced AODV to counter Blackhole Attacks in MANETS.

Department of Artificial Intelligence and Machine Learning Academic Year: 2023-2024

Topic: A Hands-on Skilling Workshop on Bits & Bytes of Networking using NS2

Date: 7-02-2024

Assessment Questions:

1. Which layer of the OSI model handles routing of data packets?

- A) Data Link
- **B) Network**
- C) Transport
- D) Application

2. Which type of cable is commonly used for Ethernet networking?

- A) Coaxial cable
- **B) Twisted pair cable**
- C) Fiber optic cable
- D) USB cable

3. Point-to-point networks are most commonly used in which of the following applications?

- A) LAN networks in large organizations
- B) Internet Service Provider (ISP) backbone connections
- **C) Direct communication between two nodes**
- D) Wireless mesh networks

4. What is one of the main factors that affects the performance of a sliding window protocol?

- A) The encryption strength of the data
- **B) The window size and network latency**
- C) The size of the data packets
- D) The physical distance between sender and receiver

5. Which phase of TCP congestion control involves the exponential increase of the congestion window?

- **A) Slow Start**
- B) Congestion Avoidance
- C) Fast Retransmit
- D) Fast Recovery

ATTESTED COPY

6. Which TCP mechanism involves retransmitting a packet before the retransmission timer expires?

- A) Slow Start
- B) Congestion Avoidance
- **C) Fast Retransmit**
- D) Fast Recovery

7. Which of the following applications is most likely to use UDP instead of TCP?

- A) File Transfer Protocol (FTP)
- B) Web browsing
- **C) Real-time video streaming**
- D) Email transmission

8. What is the purpose of the checksum field in TCP and UDP headers?

- A) To identify the port number
- B) To specify the length of the data
- **C) To detect errors in the header and data**
- D) To control the flow of data

9. What is the primary advantage of using Cyclic Redundancy Check (CRC) over simple parity checks?

- A) CRC can detect only single-bit errors.
- **B) CRC can detect both single-bit and burst errors with high accuracy.**
- C) CRC is faster to compute than parity checks.
- D) CRC requires less computational power than parity checks

10. Which statement correctly differentiates the leaky bucket algorithm from the token bucket algorithm?

- A) The leaky bucket algorithm allows variable burst traffic, while the token bucket allows only constant rate traffic.
- **B) The leaky bucket algorithm provides a constant rate output, while the token bucket allows for bursts of data transmission.**
- C) Both algorithms allow only constant rate traffic.
- D) Both algorithms drop excess data when the bucket is full.

11. What is a computer network?

- a) A device used to display information on a computer screen.
- **b) A collection of interconnected computers and devices that can communicate and share resources.**
- c) A type of software used to create documents and presentations.
- d) The physical casing that protects a computer's internal components

12. Which of the following is an example of Bluetooth?

- a) wide area network
- b) virtual private network
- c) local area network
- **d) personal area network**

13. Which one of the following is not a function of network layer?

- a) congestion control
- **b) error control**
- c) routing
- d) inter-networking

14. Which of the following devices forwards packets between networks by processing the routing information included in the packet?

- a) firewall
- b) bridge
- c) hub
- **d) router**

15. Which layer does the data link layer take packets from and encapsulate them into frames for transmission?

- **a) transport layer**
- b) application layer
- c) network layer
- d) physical layer

16. Which of this is not a network edge device?

- **a) Switch**
- b) PC
- c) Smartphones
- d) Servers

17. Which topology requires a multipoint connection?

- Ring
- **b) Bus**
- c) Star
- d) Mesh

18. Which of the following maintains the Domain Name System?

- a single server
- b) a single computer
- **c) distributed database system**
- d) none of the mentioned

19. Which of the following are Gigabit Ethernets?

- 1000 BASE-LX
- b) 1000 BASE-CX
- c) 1000 BASE-SX
- **d) All of the mentioned**

20. Which layer is responsible for process to process delivery in a general network model?

- session layer
- b) data link layer
- **c) transport layer**
- d) network layer

21. What does each packet contain in a virtual circuit network?

- only source address
- b) only destination address
- c) full source and destination address
- **d) a short VC number**

22. Which of the following is the network layer protocol for the internet?

- hypertext transfer protocol
- b) file transfer protocol
- c) ethernet
- **d) internet protocol**

23. What type of transmission is involved in communication between a computer and a keyboard?

- Half-duplex
- b) Full-duplex
- **c) Simplex**
- d) Automatic

Course outcome:

Upon successful completion of this course, students were able to:

- Confidently navigate and utilize the NS2 simulation environment.
- Write and modify TCL scripts to simulate various network scenarios. Successfully install and configure NS2 on different operating systems.
- Create and configure complex network topologies, including both wired and wireless networks. Define and simulate different types of network nodes, links, and traffic patterns.
- Design dynamic and scalable network simulations reflecting real-world conditions. Simulate key network protocols at different layers, such as TCP, UDP, and various routing protocols.
- Analyse and compare the performance of these protocols under different network conditions. Experiment with protocol parameters to observe their impact on network behaviour.
- Generate and interpret NS2 trace files to extract detailed simulation data. Use scripting tools like AWK and Perl to process and analyse large datasets.

Department of Artificial Intelligence and Machine Learning

Course objective:

- Understand the Fundamentals of Network Simulation
- Acquire Proficiency in Using NS2.
- Design and Simulate Network Topologies.
- Implement and Analyse Network Protocols.
- Collect and Analyse Simulation Data
- Visualize Network Simulations
- Conduct Performance Evaluation and Optimization
- Apply Simulation Techniques to Real-World Networking Problems.
- Develop Skills in Network Research and Development

Syllabus

- Introduction Physical Layer
- Implement Three nodes point – to – point network
- Introduction to data link layer
- Implement transmission of ping messages/trace route over a network topology
- The Network Layer, Implement an Ethernet LAN using n nodes and set multiple traffic nodes and plot congestion window for different source / destination
- Find the shortest path between vertices using bellman-ford algorithm
- The Transport Layer
- Congestion Control Algorithms, Application Layer, Internet protocols.

Event Report on A Hands-on Skilling Workshop on Bits & Bytes of Networking using NS2

Date: 01-02-2024 to 7-02-2024

Day 1: Understanding Fundamentals and Scope of Network Simulation

Objectives Covered:

- Understand the purpose and scope of network simulation in analyzing network behaviors.
- Identify strengths and limitations of using NS2 and similar simulators for network analysis.
- Differentiate between various network simulation tools and methodologies.

Key Takeaways: Day 1 focused on laying the foundation of network simulation. Participants gained insights into why simulation is crucial for network analysis, its applications, and the comparative analysis of various simulation tools. Understanding the scope helped in setting expectations for deeper exploration into NS2 and its capabilities.

Day 2: Proficiency in Using NS2

Objectives Covered:

- Installation and configuration of NS2 on different operating systems.
- Navigation and utilization of the NS2 environment and associated tools.
- Writing and modifying TCL scripts to define simulation scenarios.

ATTESTED COPY

PRINCIPAL
CITY ENGINEERING COLLEGE
Kanakapura Main Road, Bangalore-560061

CITY ENGINEERING COLLEGE

Approved by AICTE New Delhi & Affiliated by VTU, Belagavi
Doddakallasandra, Off Kanakapura Main Road,
Next to Gokulam Apartment, Bangalore - 560 062.

Key Takeaways: Participants acquired practical skills in setting up NS2, navigating its interface, and executing basic simulations. The hands-on session with TCL scripting enabled them to define custom network scenarios, laying the groundwork for more complex simulations in subsequent sessions. This day emphasized practical proficiency, ensuring all participants were comfortable with the essential tools and scripting required for network simulation.

Day 3: Designing and Simulating Network Topologies

Objectives Covered:

- Creation and configuration of various network topologies, including wired and wireless networks.
- Implementation of different types of network nodes and connections.
- Simulation of dynamic network scenarios with changing topologies.

Key Takeaways: Day 3 focused on practical application by designing and simulating network topologies using NS2. Participants learned to create both wired and wireless network configurations, deploying nodes and connections as per defined scenarios. The session also included dynamic simulations where participants could observe how network behavior changes with altering topologies. This hands-on experience enhanced their understanding of network structure and dynamics within NS2 simulations.

Day 4: Implementing and Analyzing Network Protocols

Objectives Covered:

- Simulation and analysis of key network protocols such as TCP, UDP, and routing protocols.
- Comparison of protocol performance under various conditions.
- Analysis of protocol parameters' impact on network performance.

Key Takeaways: Day 4 delved into the implementation and analysis of network protocols

using NS2. Participants gained insights into simulating protocols at different layers of the OSI model, including TCP, UDP, and routing protocols. Through practical exercises, they compared protocol performances under varying conditions, assessing metrics like throughput, delay, and packet loss. This session enabled participants to understand the nuances of protocol behavior within simulated environments and to analyze their effects on network performance.

Sub: Regarding Permission to conduct a Value – Added Course on Time Management
for Personal & Professional Productivity

Respected Sir,

We would like to conduct a Value - Added Course on the “**Time Management for Personal & Professional Productivity**” as a valued added course for third year students from 26/12/2023 to 30/12/2023. The course is designed to help individuals maximize their efficiency and effectiveness in both personal and professional realms. By learning how to prioritize tasks, participants can focus on what truly matters, reducing stress and improving work-life balance. So, I request you to permit us to conduct this course. Kindly do the needful.

Yours Sincerely

Dr. Sowmya Naik P T
HOD
Department of CSE

ABOUT THE DEPARTMENT

The Department of Computer Science & Engineering was started in the year 2001 is known for imparting Quality education and carrying out cutting edge research. In addition to the UG program, PG CSE program and Research facilities for Ph.D. The department offers undergraduate program and has a comprehensive curriculum on topics related to software and hardware with an emphasis on theoretical and practical learning. It has well equipped, state of the art laboratories supported by highspeed Internet and wireless networks.

ABOUT THE COURSE

Time Management for Personal & Professional Productivity is a comprehensive course designed to equip individuals with essential time management techniques. It focuses on strategies to boost productivity by prioritizing tasks, setting achievable goals, and minimizing distractions. The course also addresses methods for reducing stress through effective planning and time allocation, enabling individuals to handle both personal and professional responsibilities efficiently. By mastering these techniques, participants can achieve a balanced and fulfilling lifestyle, ensuring they make the most of their time. This holistic approach to time management not only enhances productivity but also promotes overall well-being and satisfaction

COURSE OUTCOMES

- Enhance productivity and reduce stress.
- Prioritize SMART goals for balanced lifestyle.
- Develop realistic schedules using planning tools.
- Overcome procrastination with practical strategies.
- Create personalized time management plans for work-life balance.

ABOUT RESOURCE PERSON

Yashaswini M is a Faculty & State Program Coordinator – Karnataka, The Art of Living. Professionally an Electronic and Communications Engineer, worked with Yahoo, passionately she is a volunteer and full-time faculty with The Art of Living.

For the past 14 years, she is actively involved with The Art of Living Organization with various service activities. She has managed different profiles like, content writer and SEO operator for Art of Living Digital team, Finance and Operations Manager, National Program Manager for The Art of Living children and teens programs, India. Here, she has contributed in organizational design and development by strategizing policies, devising organizational modules and operational modules that helped manage 4500+ teachers across India.

Department of Computer Science and Engineering

Academic Year: 2023-2024

Date: 26-12-2023 to 30-12-2023

Value Added Course on Time Management for Personal & Professional Productivity

Assessment Questions

1. What is the first step in effective time management?
 - a) Creating a to-do list
 - b) Identifying goals and priorities**
 - c) Delegating tasks
 - d) Scheduling breaks
2. Which of the following is a benefit of using a time management tool like a planner or calendar?
 - a) Reduces procrastination**
 - b) Increases stress levels
 - c) Decreases productivity
 - d) Promotes multitasking
3. What does the "80/20 Rule" (Pareto Principle) suggest in the context of time management?
 - a) 80% of results come from 20% of efforts**
 - b) 20% of results come from 80% of efforts
 - c) 80% of time should be spent on planning
 - d) 20% of time should be spent on execution
4. Which time management technique involves working for 25 minutes and then taking a 5-minute break?
 - a) Pomodoro Technique**
 - b) Time Blocking
 - c) Eisenhower Matrix
 - d) ABC Analysis
5. What is the main purpose of setting SMART goals?
 - a) To make goals vague and flexible
 - b) To ensure goals are Specific, Measurable, Achievable, Relevant, and Time-bound**
 - c) To increase the complexity of goals
 - d) To delegate goals to others
6. Which of the following is an example of a high-priority task?
 - a) Organizing your email inbox
 - b) Completing a critical project with a tight deadline**
 - c) Attending a social event
 - d) Taking a long lunch break

7. What is the key concept behind the Eisenhower Matrix?
 - a) **Prioritizing tasks based on urgency and importance**
 - b) Scheduling tasks in 30-minute increments
 - c) Breaking tasks into smaller steps
 - d) Multitasking multiple projects simultaneously

8. How can time management improve work-life balance?
 - a) By increasing work hours
 - b) **By planning and prioritizing tasks to ensure time for personal activities**
 - c) By ignoring personal commitments
 - d) By focusing solely on professional tasks

9. Which of the following is a common time-wasting habit?
 - a) Setting clear goals
 - b) **Regularly checking social media during work hours**
 - c) Delegating tasks effectively
 - d) Using a task management app

10. What is the primary benefit of delegating tasks?
 - a) Reducing the quality of work
 - b) Increasing personal workload
 - c) **Allowing focus on more important tasks**
 - d) Micromanaging team members

11. What are some benefits of effective time management?
 - a) Increased stress and anxiety
 - b) **B. Improved productivity and efficiency**
 - c) C. Decreased focus on priorities
 - d) D. Lack of accountability

12. Which self-assessment tool helps identify current time management habits?
 - a) SWOT analysis
 - b) Eisenhower Matrix
 - c) SMART goals
 - d) **Time audit**

13. What does SMART stand for in relation to goal setting?
 - a) Simple, Measurable, Achievable, Realistic, Timely
 - b) **Specific, Measurable, Achievable, Relevant, Timely**
 - c) Strategic, Measurable, Achievable, Realistic, Time-bound
 - d) Specific, Measurable, Action-oriented, Relevant, Time-bound

14. Which technique helps differentiate urgent tasks from important tasks?
 - a) Pareto Principle
 - b) Eisenhower Matrix**
 - c) SWOT analysis
 - d) Time blocking

15. What is a common tool for daily planning?
 - a) Gantt chart
 - b) Mind map**
 - c) To-Do list**
 - d) Kanban board

16. What is the purpose of buffer time in scheduling?
 - a) To allow for flexibility and unexpected delays**
 - b) To cram more tasks into a tight schedule
 - c) To avoid scheduling important tasks
 - d) To spend extra time on non-priority tasks

17. Which technique is effective for overcoming procrastination?
 - a) Time blocking
 - b) Multitasking
 - c) Avoiding planning
 - d) Pomodoro Technique**

18. What is a common distraction management technique?
 - a) Checking email constantly
 - b) Setting strict deadlines
 - c) Time blocking
 - d) Turning off notifications**

19. Which energy management technique involves alternating work and rest periods?
 - a) Multitasking
 - b) Pomodoro Technique**
 - c) Procrastination
 - d) Time blocking

20. What is an advantage of digital time management tools over analog tools?
 - a) Better for visual learners
 - b) More customizable**
 - c) Less distracting
 - d) Limited to specific tasks

21. What is a potential risk of multitasking?
 - a) Increased productivity
 - b) **Reduced focus**
 - c) Improved efficiency
 - d) Better time management

22. What is a key step in creating a personalized time management plan?
 - a) Avoiding routines
 - b) Setting unrealistic goals
 - c) **Continuous improvement**
 - d) Ignoring feedback

23. Which tool helps in prioritizing tasks based on importance and urgency?
 - a) Gantt chart
 - b) Kanban board
 - c) **Eisenhower Matrix**
 - d) SWOT analysis

24. What is the purpose of reviewing and reflecting in time management?
 - a) Avoiding accountability
 - b) Reinforcing bad habits
 - c) **Identifying areas for improvement**
 - d) Decreasing productivity

25. What should be included in a course conclusion session on time management?
 - a) Key takeaways and final exam
 - b) Q&A session only
 - c) **Summary of key points and feedback**
 - d) Focus on theoretical concepts

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

VALUE ADDED COURSES

A five-day Value-Added Course on **Time Management for Personal & Professional Productivity** was organised by the Department of Computer Science and Engineering from 26th to 30th December 2023 for Computer Science and Engineering students in the seminar hall by Ms. Yashaswini M is a Faculty & State Program Coordinator - Karnataka The Art of Living. was the resource person.

Day 1:

Morning Session:

The event began with a formal inaugural function. **Dr. Thippeswamy H N, Principal CEC, HOD of CSE** were present during the inauguration. The program began by seeking the blessings of Almighty with invocation and lighting of lamp. Principal advised the students to utilize the benefits of the course completely. **Dr. Sowmya Naik P T** Welcomed the resource person and gave a course overview. Later the session was handed over to the speaker.

FIG 3: INTERACTIVE Q&A SESSION

Day 1: Introduction to Time Management

The first day focused on understanding the basics of time management and its significance in personal and professional life. Participants were introduced to the benefits and challenges of effective time management. The session included self-assessment activities to help them identify their current time management habits. The afternoon session covered goal setting, emphasizing the importance of SMART goals and differentiating between long-term and short-term objectives. Participants also learned various prioritization techniques such as the Eisenhower Matrix, ABCDE method, and Pareto Principle to help them manage their tasks more efficiently.

Day 2: Planning and Scheduling

Day two was dedicated to planning and scheduling techniques. The morning session highlighted the importance of planning and introduced various types of plans (daily, weekly, monthly) and tools for effective planning, such as planners and digital apps. In the afternoon, participants learned how to create realistic schedules, utilize time blocking, and incorporate buffer time for flexibility. The session also focused on the creation of effective to-do lists and the importance of delegation. Techniques for effective delegation and overcoming barriers to delegation were discussed to help participants manage their workload better.

Day 3: Enhancing Productivity

The third day aimed at boosting productivity by tackling procrastination and improving focus and concentration. Participants explored the causes of procrastination and learned techniques to

overcome it, such as breaking tasks into smaller steps and setting deadlines. The session also introduced various time management tools to combat procrastination. Techniques to enhance focus, manage distractions, and use the Pomodoro Technique were covered. The afternoon session focused on energy management, highlighting the connection between energy levels and productivity and providing strategies to maintain high energy and achieve work-life balance.

Day 4: Advanced Time Management Techniques

On the fourth day, participants delved into advanced time management techniques and tools. The morning session provided an overview of popular time management tools and apps, comparing digital and analog options to help participants choose the best fit for their needs. The session also covered batch processing and multitasking, explaining their benefits and risks, and introducing effective multitasking techniques. In the afternoon, the focus shifted to decision making, discussing its role in time management, introducing various decision-making techniques, and addressing decision fatigue to help participants make more effective and efficient decisions.

Day 5: Implementing and Sustaining Time Management Practices

The final day was about consolidating knowledge and implementing sustainable time management practices. The morning session involved reviewing key concepts from the course and reflecting on personal time management practices. Participants shared their experiences and insights, fostering a collaborative learning environment. They then created personalized time management plans, focusing on setting up routines and habits for continuous improvement. The afternoon session emphasized maintaining work-life balance, providing strategies and stress management techniques to help participants achieve a healthy balance between work and personal life. The course concluded with a summary of key takeaways, a final Q&A session, and a feedback and evaluation segment to gather participants' input on the course.

To,
The principal,
City Engineering College.
Bengaluru.

Date: 22/12/2023

Respected sir,

Sub: Regarding permission to value-added course on
“Applied Machine Learning for Electronics Engineers”

We would like to conduct a value-added course on **“Applied Machine Learning for Electronics Engineers”** for ACY 2023-24 3rd semester students from 26/12/2023 to 30/12/2023.

Machine learning is increasingly relevant for electronics engineers, offering powerful tools to analyse data, optimize processes, and create intelligent systems. This value-added course aims to equip third-semester ECE students with practical skills in machine learning, specifically tailored to applications in electronics engineering. It emphasizes hands-on learning through projects and assignments, ensuring students are well-prepared to apply machine learning techniques to real-world problems in their future careers.

This interdisciplinary knowledge enables engineers to innovate and create smarter electronic systems capable of adapting to and learning from their environments.

Hence, I am seeking the permission to conduct the course. Kindly do the needful.

Your's sincerely,

[Mallikarjuna G S]
HOD, ECE

Professor & Head
Dept. of Electronics &
Communication Engineering
City Engineering College,
Doddakallasandra, Kanakapura Main Road,
Bangalore-560 062.

CIRCULAR

This is to inform that a 5-day Value-added course on “**Applied Machine Learning for Electronics Engineers**” by **Dr S Vagdevi , HOD, AI&ML**, CEC, Bengaluru., has been organized on 26/12/2023 to 30/12/2023 for 3rd semester students. All the students have to participate compulsorily for the same. Attendance will be viewed strictly. All the students are hereby instructed to attend the session and get the maximum benefits.

[G.S. Mallikarjuna]

About the ECE Department	Resource Person	Guidelines
<p>The department of Electronics and communication engineering was started in the year 2001 is known for imparting quality education. The department has good infrastructure with experienced faculties. Organizes industrial visits, workshops, technical talks, project exhibitions and training programs regularly which helps in bridging the gap between academics and industry.</p> 	 <p>Dr S. VAGDEVI B.E., M.E., M.S., Ph.D. HOD, Dept. of AI&ML, CEC, Bengaluru</p> 	<p>A test (assessment questions) will be conducted by the coordinators at the end of the program. The certificates will be issued to those participants who have attended the program with minimum 80% attendance and scored minimum 60% marks in the test.</p> 
<p>About the course</p> <p>Machine learning is increasingly relevant for electronics engineers, offering powerful tools to analyse data, optimize processes, and create intelligent systems. Value Added Course on **“Applied Machine Learning for Electronics Engineers”**

SEMESTER: III

Course schedule

Day & Date	Session-1 9:15 - 11:15am		Session-2 11:30am to 1:30pm		Session-3 2:00pm to 4:00pm
1 26/12/2023	Overview of machine learning concepts, types of learning		Applications in electronics engineering Introduction to Python programming		Basics of NumPy, Pandas, and Matplotlib for data manipulation and visualization.
2 27/12/2023	Data cleaning techniques: handling missing data, outlier detection and removal		Data normalization, standardization, and feature scaling.		Techniques for creating new features from existing data. Importance of feature selection and dimensionality reduction.
3 28/12/2023	Understanding linear models for regression and classification tasks Implementation and interpretation of results.	11:15am - 11:30am	Introduction to decision trees and their construction.	1:30pm - 2:00pm	Ensemble methods: Random forests and boosting algorithms.
4 29/12/2023	K-means clustering and hierarchical clustering techniques. Practical applications in grouping and segmenting data in electronics	Tea break	Principal Component Analysis (PCA) for feature extraction.	Lunch break	Visualizing high-dimensional data using PCA and t-SNE.
5 30/12/2023	Using machine learning to predict failures and perform preventive maintenance in electronic systems.		Case studies and real-world examples. Techniques for detecting anomalies and outliers in sensor data.		Visualizing High-dimensional data using PCA and t-SNE.

Department of Electronics and Communication Engineering
Value Added Course on ““**Applied Machine Learning for Electronics Engineers**”
SEMESTER: III

SYLLABUS

Course Objectives:

1. To introduce fundamental concepts of machine learning and its applications in electronics engineering.
2. To enable students to apply machine learning techniques to solve real-world problems in electronics.
3. To foster critical thinking and analytical skills necessary for designing and implementing machine learning solutions.
4. To encourage collaboration and teamwork through hands-on projects and assignments.

Module 1: Introduction to Machine Learning Basics

Introduction to Machine Learning - Overview of machine learning concepts, types of learning (supervised, unsupervised, reinforcement), and their applications in electronics engineering. Python for Machine Learning; Introduction to Python programming (if not already covered in core courses). Basics of NumPy, Pandas, and Matplotlib for data manipulation and visualization.

Module 2: Data Preprocessing and Feature Engineering

Data Preprocessing -Data cleaning techniques: handling missing data, outlier detection and removal; Data normalization, standardization, and feature scaling; Feature Engineering-Techniques for creating new features from existing data; Importance of feature selection and dimensionality reduction.

Module 3: Supervised Learning Techniques

Linear Regression and Logistic Regression-Understanding linear models for regression and classification tasks. Implementation and interpretation of results; Decision Trees and Ensemble Methods-Introduction to decision trees and their construction; Ensemble methods: Random forests and boosting algorithms.

Module 4: Unsupervised Learning Techniques

Clustering Algorithms; K-means clustering and hierarchical; clustering techniques
Practical applications in grouping and segmenting data in electronics.
Dimensionality Reduction-Principal Component Analysis (PCA) for feature extraction.
Visualizing high-dimensional data using PCA and t-SNE.

Module 5: Applications in Electronics Engineering

Predictive Maintenance-Using machine learning to predict failures and perform preventive maintenance in electronic systems; Case studies and real-world examples
Anomaly Detection in Electronic Circuits; Techniques for detecting anomalies and outliers in sensor data; Application of unsupervised learning algorithms for anomaly detection.

SEMESTER: III

Additional Resources:

- Recommended Reading: Textbooks and online resources for deeper understanding.
- Software Tools: Access to machine learning libraries (scikit-learn, TensorFlow) and development environments (Jupyter Notebook).

Course Outcomes:

By the end of the course, students should be able to:

1. Understand the basic principles and algorithms of machine learning and their relevance to electronics engineering.
2. Preprocess and analyze data using Python and relevant libraries for machine learning tasks.
3. Implement and evaluate supervised and unsupervised learning algorithms such as regression, classification, clustering, and dimensionality reduction.
4. Apply machine learning techniques to predict failures, detect anomalies, and optimize performance in electronic systems.
5. Design and execute a machine learning project in electronics engineering, demonstrating proficiency in problem-solving and critical thinking.

Resource person details

Dr S. VAGDEVI B.E., M.E., M.S., Ph.D.

HOD, AI&ML, CEC

She has a Value Based teaching of 34 years, Constant source of inspiration and motivation to students. Being proactive, quality conscious and result oriented she works in a highly challenging and teaching frame work. Actively involved in research activities, publishing papers in esteemed journals, guiding PhD students, perceiving funded projects and patents.

- International Journals: 23
 - International conference: 08
 - National conference: 11
 - Citations by 37 documents
 - Patents: 03
- Title of the Invention: AI BASED APPROACH FOR ENERGY/ POWER TRANSMISSION THROUGH WIRELESS NETWORKS Application No.202241060521 A Publication Date: 28/10/2022 (AIML faculties)
- Indian Patent Published with Title of Invention “Calibration of Low-cost Internet of Things Sensors in Environmental monitoring networks via Application of Machine Learning Techniques” Application No.202441005407 dated 09/02/2024
- Indian Patent published with Title of Invention “Machine Learning based Solid waste management in Smart Cities” with application number 202341035068, patent office journal number 35/2023 dated 01-09-2023.
- Co-Authored TEXT BOOK: TITLE OF THE BOOK: CRYPTOGRAPHY AND NETWORK SECURITY: Principles and Practices: SIPH publications.
 - Research Scholars: 5 Scholars registered under VTU where 3 Scholars awarded Ph.D. One research scholar took a transfer from VTU RRC to CEC CSE RC Academics Question Paper setter for VTU CSE Dept. SEMESTER: III

Assessment Questions

[1*25=25M]

1. Which of the following machine learning tasks is used for predicting continuous values?

- A) Classification B) Regression C) Clustering D) Dimensionality reduction

2. In machine learning, what is overfitting?

- A) Model is too simple and fails to capture underlying patterns
B) Model performs well on training data but poorly on unseen data
C) Model is trained with insufficient data
D) Model has high bias and low variance

3. Which Python library is commonly used for data manipulation and analysis in machine learning?

- A) TensorFlow B) PyTorch C) NumPy D) Keras

4. Which ML algorithm is used for detecting anomalies in electronic circuits based on sensor data?

- A) K-means clustering B) Random forest C) Support Vector Machine (SVM)
D) Isolation Forest

5. What does PCA stand for in the context of machine learning?

- A) Principal Component Analysis B) Predictive Component Algorithm
C) Principal Component Algorithm D) Primary Component Analysis

6. Which evaluation metric is appropriate for imbalanced classification problems where the focus is on correctly identifying positive cases?

- A) Accuracy B) Precision C) F1-score D) Recall

7. Which ML technique is used for combining multiple weak learners to improve prediction accuracy?

- A) Decision trees B) Support Vector Machines C) Ensemble methods D) Neural networks

8. Which algorithm is commonly used for image recognition tasks in electronics engineering?

- A) Linear regression B) Convolutional Neural Networks (CNNs)
C) K-nearest neighbors (KNN) D) Gradient Boosting Machines (GBM)

9. Which step in the machine learning pipeline involves transforming raw data into a format suitable for modelling?

- A) Model selection B) Data preprocessing C) Model evaluation D) Feature engineering

10. Which of the following is NOT a dimensionality reduction technique?

- A) Principal Component Analysis (PCA) B) t-Distributed Stochastic Neighbor Embedding (t-SNE)
C) Random Forest D) Singular Value Decomposition (SVD)

11. What is the purpose of cross-validation in machine learning?

- A) To increase the training time of the model
B) To reduce overfitting by assessing model performance on unseen data
C) To boost the accuracy of the model
D) To speed up the convergence of gradient descent

12. Which machine learning algorithm is used for both regression and classification tasks, depending on the problem setup?

- A) Decision trees B) Support Vector Machines (SVM)
C) K-nearest neighbors D) Random Forest

13. Which type of learning would be most appropriate for predicting the remaining useful life of electronic components based on historical data?

- A) Supervised learning B) Unsupervised learning
C) Reinforcement learning D) Semi-supervised learning

14. Which evaluation metric balances precision and recall in binary classification problems?

- A) Accuracy B) F1-score C) Mean Squared Error (MSE) D) R-squared (R^2)

15. Which machine learning technique is best suited for identifying patterns in time series data from electronic sensors?

- A) Random forest
- B) Recurrent Neural Networks (RNNs)
- C) Support Vector Machines
- D) Gradient Boosting Machines (GBM)

16. Which method is used for handling missing data in a dataset before applying machine learning algorithms?

- A) Removing rows with missing data
- B) Replacing missing values with the mean of the column
- C) Ignoring missing values during model training
- D) All of the above

17. Which algorithm can handle both numerical and categorical data directly without requiring preprocessing into numerical values?

- A) Support Vector Machines (SVM)
- B) Decision trees
- C) K-nearest neighbors (KNN)
- D) Gradient Boosting Machines (GBM)

18. Which technique is used to reduce variance in machine learning models and prevent overfitting?

- A) Regularization
- B) Feature selection
- C) Hyperparameter tuning
- D) Data augmentation

19. Which algorithm is used for recommendation systems in electronics products based on user preferences?

- A) K-means clustering
- B) Apriori algorithm
- C) Collaborative filtering
- D) Decision trees

20. In which step of the machine learning pipeline does the model learn from the data to make predictions?

- A) Feature engineering
- B) Model training
- C) Data preprocessing
- D) Model evaluation

21. Which method is used to visualize high-dimensional data in lower dimensions for better understanding and analysis?

- A) Principal Component Analysis (PCA)
- B) K-means clustering
- C) Random forest
- D) Gradient descent

22. Which algorithm is used for sequence prediction tasks in electronics engineering, such as predicting stock prices or sensor readings?

- A) Linear regression
B) Recurrent Neural Networks (RNNs)
C) Support Vector Machines (SVM)
D) Decision trees

23. Which technique is used for combining predictions from MML models to improve accuracy?

- A) Bagging
B) Boosting
C) Stacking
D) All of the above

24. The metric measuring the degree of correlation between predicted and actual values in regression tasks?

- A) Accuracy
B) Precision
C) Mean Squared Error (MSE)
D) R-squared (R^2)

25. Which technique is used for tuning the hyperparameters of machine learning models to optimize performance?

- A) Cross-validation
B) Grid search
C) Random search
D) All of the above

SEMESTER: III

Student Feed Back Analysis chart

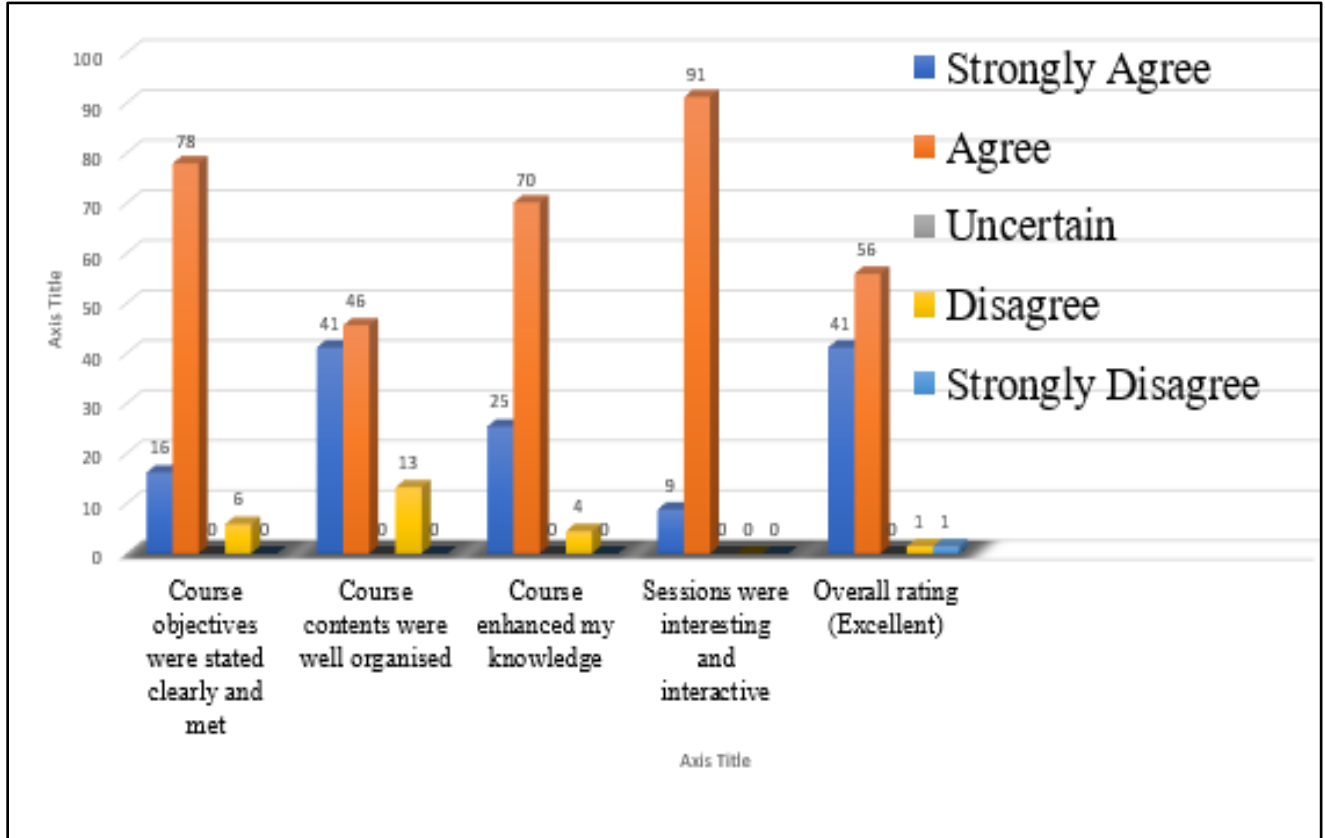

Figure.1: Student Feed Back Analysis chart

Feedback summary:

1. Students Understood the basic principles and algorithms of machine learning and their relevance to electronics engineering.
2. Preprocessed and analyzed data using Python and relevant libraries for machine learning tasks.
3. Implemented and evaluated, supervised and unsupervised learning algorithms such as regression, classification, clustering, and dimensionality reduction.
4. Applied machine learning techniques to predict failures, detect anomalies, and optimize performance in electronic systems.

Department of Electronics and Communication Engineering
Value Added Course on ““Applied Machine Learning for Electronics Engineers”
SEMESTER: III

Course report

A five-day Value-Added course on " Applied Machine Learning for Electronics Engineers " was organized by Department of Electronics and Communication Engineering from 26/12/2023 To 30/12/2023. for third sem ECE students.

The resource person was Dr. Vagdevi, HOD, AI & ML, CEC.

Day 1: The event began with a formal inaugural function attended by the principal, HODs of various departments, HOD- ECE, faculties and students.

Program started with the prayer. Welcome address, Introduction about the course and the resource person was given by Mr. Vishva Kiran, faculty, ECE. later the session was handed over to the resource person. Resource person explained overview of machine learning concepts, Introduction to Python programming.

Day 2: Data cleaning techniques; Data normalization, standardization, Techniques for creating new features from existing data. Importance of feature selection and dimensionality reduction.

Day 3: Understanding linear models for regression, Introduction to decision trees & Ensemble methods.

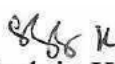

Day:4 Practical applications in grouping and segmenting data in electronics, visualizing high-dimensional data using PCA and t-SNE

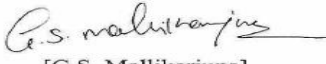

Day 5: Final presentation by the resource person about Using machine learning to predict failures and perform preventive maintenance in electronic systems, Case studies and real-world examples. Techniques for detecting anomalies and outliers in sensor data was given and concluded the session.

Participants shared their views about the course.

One of the most significant takeaways from this course is the ability to apply machine learning models to predict behaviors in electronic components

The course concluded with a quote. "**Machine learning is the electricity of the 21st century. It will empower everything we do in electronics engineering.**"

Sub: Regarding Permission to conduct Value added course on “Leadership and Management”.

Respected Sir,

We would like to conduct a certificate course on “Leadership and Management” for first year students from Date 06-11-23 to 10-11-23. This course is intended to engage the students for improving Leadership qualities, team dynamics and conflict resolution. It helps the student to have an understanding of how to manage projects and to lead teams. So,

I request you to permit us to conduct this course. Kindly do the needful.

About Applied Science and Humanities	Expert Speakers for the Program	About Leadership and Management
<p>The Applied Science and Humanities Department in City Engineering College serves as a fundamental pillar, providing essential knowledge in fundamental scientific disciplines such as mathematics, physics, and chemistry. This Department plays a critical role in equipping engineering students with the core scientific principles and analytical skills necessary for their specialized engineering studies. Faculty members in the Applied Science Department typically engage in both teaching and research, contributing to advancements in their fields and enhancing the overall academic environment. The department often offers courses that support and complement the various engineering programs, ensuring that students have a strong scientific grounding to solve complex engineering problems effectively.</p>	<p>Dr. Rajesh Associate Professor Er. It covers essential topics such as effective communication, team building, conflict resolution, and decision-making processes. The course aims to develop strong leadership qualities and managerial competencies, enabling individuals to inspire and motivate their teams, drive organizational success, and adapt to changing business environments. Participants will gain practical insights and tools to lead with confidence and foster a collaborative and productive workplace culture.</p>

Resource Person Details

Dr. Rajesh

Associate Professor

Er.Perumal Manimakalai Engineering College

Hosur

Professor Dr. Rajesh R is a highly esteemed academic leader and a prominent figure in the realm of management education. As the Head of the MBA Department, he has demonstrated exceptional vision, leadership, and scholarship, inspiring a new generation of business professionals. With a distinguished spanning 15 years, Professor Dr. Rajesh R has made significant contributions to teaching, research, and industry, authoring numerous papers, books, and case studies. His expertise in Human Resource Management is highly regarded, and he has presented at various national and international conferences.

Under his guidance, the MBA Department has flourished, with a strong focus on innovation, entrepreneurship, and socially responsible business practices. His dedication to mentoring students, fostering collaborations with industry partners, and promoting interdisciplinary research has created a vibrant academic community. Professor Dr. Rajesh R 's leadership has not only shaped the department but also inspired a culture of innovation, inclusivity, and social responsibility, preparing future business leaders to make a positive impact in the world."

8. Which of the following is an example of intrinsic motivation?
- A) A bonus check
 - ~~B) A promotion~~
 - C) Personal satisfaction
 - D) Company car
9. In Maslow's Hierarchy of Needs, which need is at the top of the pyramid?
- A) Safety needs
 - B) Social needs
 - ~~C) Esteem needs~~
 - D) Self-actualization
10. Which type of power is derived from a person's formal position within an organization?
- A) Expert power
 - B) Referent power
 - C) Legitimate power
 - D) Coercive power
11. What is the main focus of transformational leadership?
- ~~A) Maintaining the status quo~~
 - B) Implementing strict controls
 - C) Inspiring and motivating change
 - D) Enforcing rules and policies
12. Which management approach focuses on improving efficiency through scientific analysis of work?
- ~~A) Human Relations Approach~~
 - B) Bureaucratic Management
 - C) Scientific Management
 - D) Systems Theory
13. Which of the following best describes emotional intelligence in leadership?
- ~~A) The ability to implement strategies effectively~~
 - B) The ability to understand and manage one's own emotions and the emotions of others
 - C) The ability to create financial forecasts
 - D) The ability to design organizational structures
14. What is the main goal of performance management in an organization?
- A) To punish poor performance
 - B) To improve employee performance and development
 - C) To reduce operating costs
 - D) To increase market share
15. Which of the following is a key trait of ethical leadership?
- A) Prioritizing personal gain
 - ~~B) Lack of transparency~~
 - C) Consistency in actions and values
 - D) Authoritarian decision-making
16. Which leadership style is characterized by a hands-off approach, allowing team members to make decisions?
- A) Autocratic
 - B) Transformational
 - C) Democratic
 - D) Laissez-faire

17. Which of the following best describes a "flat" organizational structure?
- A) Many hierarchical levels
- **B) Few hierarchical levels**
- C) Centralized decision-making
- D) High level of bureaucracy
18. What is the main advantage of using the SMART criteria for setting objectives?
- A) Encourages vague goals
- **B) Promotes accountability and clear expectations**
- C) Ensures goals are easy to achieve
- D) Focuses on long-term goals only
19. Which of the following is a key principle of Total Quality Management (TQM)?
- A) Individual responsibility for quality
- B) Quality is the responsibility of the quality control department
- C) Continuous improvement involving all employees
- **D) Focus on short-term goals**
20. Which conflict management style involves collaboration to find a win-win solution?
- A) Competing
- B) Avoiding
- C) Compromising
- **D) Collaborating**
21. What is the purpose of a Gantt chart in project management?
- A) To assign roles to team members
- B) To outline project risks
- **C) To visualize the project schedule**
- D) To manage project finances
22. Which leadership theory focuses on the leader's ability to adapt their style to the competence and commitment of followers?
- A) Transformational Leadership
- B) Servant Leadership
- C) Situational Leadership
- **D) Trait Theory**
23. Which of the following is NOT typically a component of a SWOT analysis?
- A) Strengths
- B) Weaknesses
- C) Opportunities
- **D) Tactics**
24. Which type of decision-making process involves seeking input from all group members?
- A) Autocratic
- B) Consensus
- C) Directive
- **D) Command**
25. In Kotter's 8-Step Change Model, what is the first step to successful change management?
- A) Communicating the vision
- B) Forming a powerful coalition
- **C) Establishing a sense of urgency**
- D) Creating short-term wins

Value Added course on Leadership and Management

Course Objectives

The course objectives are

- Gain a comprehensive understanding of key leadership theories, principles and practices.
- Enhance verbal and non-verbal communication skills essential for effective leadership and management.
- Learn techniques for building, leading, and motivating high-performance teams.
- Develop critical thinking and decision-making skills necessary for effective leadership and management.
- Develop the ability to lead and manage in diverse and multicultural environments.

Course Outcomes

The students will be able to:

- Understand the fundamental differences between Leadership and Management.
- Identify and differentiate between various leadership styles such as transformational and transactional leadership.
- Develop strategies for effective team building and improving team dynamics.
- Students will understand and be able to apply change management principles to lead successful organizational transformations.
- Exhibit a strong commitment to ethical leadership and corporate social responsibility.

DEPARTMENT OF APPLIED SCIENCE & HUMANITIES

VALUE ADDED COURSES

A five-day Value-Added Course on **Leadership and Management** was organized by the Department of Applied Science & Humanities from 6th to 10th Nov 2023 for First year students in the seminar hall by Dr. Rajesh and Dr. Shalini Prasad. The schedule for a five-day Value-Added Course on Leadership and Management for Personal & Professional Productivity covered key topics.

Day 1:

The event began with a formal inaugural function. Dr. S Karunakara, Principal CEC and HOD's of Applied Science & Humanities were present during the inauguration. The program began by seeking the blessings of Almighty with invocation and lighting of lamp. Principal advised the students to utilize the benefits of the course completely. Dr. Jyothi madam Welcomed the resource person and gave a course overview. Later the session was handed over to the speaker.

On the first day, introduction of fundamental differences between leadership and management. Participants learned about the various roles and responsibilities that distinguish leaders from managers, emphasizing the unique qualities and skills required for each.

Day 2:

The second day explored different leadership styles, such as autocratic, democratic, laissez-faire, and transformational. The session focused on understanding the characteristics of each style and identifying situations where each is most effective.

Day 3:

The third day focused on motivation theories, including Maslow's Hierarchy of Needs and Herzberg's Two Factor Theory. Participants discussed how these theories can be applied to motivate teams and improve workplace satisfaction.

Day 4:

The fourth day, participants learned about the decision-making process, starting from defining the problem to evaluating the outcomes. Emphasis was placed on making informed and inclusive decisions to lead teams effectively.

Day 5:

On the final day, the focus was on ethical leadership, discussing what it means to lead ethically and how to align behavior and decisions with ethical standards. Case studies were used to illustrate real-world ethical dilemmas.

Throughout the intensive 5-day course, participants engaged in a structured and rigorous curriculum that effectively enhanced their skills. This structure ensures that participants gain a comprehensive understanding of essential leadership and management concepts over the course of the program.

Sub: Regarding permission to conduct a value-added course on “Aptitude and Soft Skills”

Respected Sir,

We would like to conduct value-added course on “Aptitude and Soft Skills” for third year students from 16-10-2023 to 20-10-2023. This course ensures that individuals are not only academically prepared but also equipped with the experience to understand the concept of Aptitude and soft skills necessary for success in the dynamic landscape of the professional world.. So, I request you to permit us to conduct this course. Kindly do the needful.

Yours Sincerely

Mr. Sakthivel B

CIRCULAR

Sub: Conducting a Value added course on “Aptitude and Soft Skills”

All the students are here by informed that our Department, Information Science and Engineering will conduct value added course on “**Aptitude and Soft Skills**” during 16-10-2023 to 20-10-2023 in offline.

The aim of this value added course is to expose the participants to the use of “Aptitude and Soft Skills” and its applications. The value added course also provides hands on experience to understand concepts of aptitude and to build soft Skills. It will provide adequate theoretical and practical understanding by the expert talk of various topics. It will be conducted in 30 hours.

The course is open for all Engineering students and not available in Curriculum, Everyone must take the benefits of this course. Students need to enrol their name towards the course coordinator before 15-10-2023.

All the students have to participate compulsorily for the same. Attendance will be viewed strictly. All the students are hereby instructed to attend the session and get the maximum benefits.

BROCHURE

About Information Science and Engineering	Expert Speakers for the Program	About Aptitude and soft skills
<p>The Information Science and Engineering Department in City Engineering College serves as a fundamental pillar, providing essential knowledge in fundamental disciplines such as advanced java and algorithms. This Department plays a critical role in equipping engineering students with the core scientific principles and analytical skills necessary for their specialized engineering studies. Faculty members in the Information Science Department typically engage in both teaching and research, contributing to advancements in their fields and enhancing the overall academic environment. The department often offers courses that support and complement the various engineering programs, ensuring that students have a strong scientific grounding to solve complex engineering problems effectively.</p>	<p>Dr. Deepak. I Assistant Professor Department of MBA City Engineering college.</p> <p>Mrs. Vanitha Assistant Professor Dept. of Basic Science City Engineering College</p> <p>Mrs. Vani Assistant Professor Dept. of ISE City Engineering College</p> <p>Ms. Meghana Assistant Professor Department of Basic Science City Engineering College</p>	 <p>Soft skills are the attributes and behaviours that describe how a person approaches their tasks. You likely use soft skills across all areas of your life—communication, critical thinking, problem-solving, and interpersonal skills are some examples of soft skills—but they’re particularly valued in the workplace. Whether you’re giving a presentation at work, delivering a speech at an event, or simply leading a meeting, the ability to communicate effectively is essential. There are many different aspects to public speaking, but some key skills include the ability.</p>

Course Assessment

MCQ Test for Value Added Course on Aptitude and Soft Skills

Course: Aptitude and Soft Skills	Time: 30 Min
Max Marks: 25	Marks Obtained:
Name of Student:	USN:

Note: - All Questions are compulsory. Each Question Carries 1 Mark

- A produces 120 bolts/40 seconds; B produces 100/20 seconds. If the two run simultaneously, how many seconds will it take for them to produce a total of 200 bolts?
A.) 22 **B.) 25** C) .28 D). 32
- If $n = 1 + x$, where x is the product of 4 consecutive positive integers, then which of the following is/are true?
1. n is odd 2. n is prime 3. n is a perfect square
A) 1 and 3 only B) 1 and 2 only **C) 1 only** D) None of these
- The gross income of a person is Rs. 25,000. 20% of his income is exempted from income-tax and the rate of income tax is 5%. His net income is.
A) 23500 B)24000 C)24500 D)None of these
- The ratio between S.P and C.P. is 7:5. What is the ratio between profit and C.P.
A) 2:7 B) 5:2 **C) 2:5** D)None of these
- If $x + 2y = 10$ and $x/y = 3$ then $x =$
A) -2 B) 2 C) 4 **D) 6**
- A trader gives a discount of 10% on list price of Rs.50 of certain articles and makes a profit of Rs.25. What is his profit margin?
A) 100% **B) 125%** C) 150% D) 120%

7. P made a profit of 15% by selling an article. Had he bought the articles for Rs.2 less, he would have made a profit of 20%. The cost price of the article is -
 A) 48 B) 50 C) 46 D) 24
8. 300 gm of sugar solution has 40% sugar. How much sugar should be added to make it 50% in the solution?
A) 55 gm B) 60 gm C) 70 gm D) 40 gm
9. 4 waiters can serve 250 dishes in 8 days by working 5 hours/day. For how many hours/day would 2 waiters have to work to serve 500 dishes in 20 days?
A) hrs/day B) 7 hrs/day C) 8 hrs/day D) 9 hrs/day
10. Two trains are moving in opposite directions. Their lengths are 100 m each and they cross each other in 8 seconds. The speed of one train is twice that of other. Find the speed of the faster train.
A) 75 kmph B) 60 kmph C) 50 kmph D) 30
11. Which of the following is an example of a soft skill?
a) Coding in Python b) Problem-solving
c) Operating heavy machinery d) Data analysis
12. Which soft skill refers to the ability to convey information effectively and listen actively to others?
a) Creativity b) Emotional intelligence
 c) Communication d) Time management
13. Which soft skill involves the capability to adjust to changing circumstances and embrace new challenges?
a) Emotional intelligence b) Adaptability
c) Leadership d) Conflict resolution

Value Added Course on Aptitude and Soft Skills

A Report on Value-Added Course on “Aptitude and Soft Skills”

A five-day Value Added Course on **Aptitude and soft skill and Presentation Skill** was organised by the Department of Information Science and Engineering from 16/10/2023 to 20/10/2023. for Information Science and Engineering students in the Project Laboratory. By **Mrs Vanita S**, Assistant Professor, Department of Basic Science in Mathematics, City Engineering College was the resource person. The event was coordinated by Dr.Sakthivel B, Professor and Head, ISE and Prof. Vani, Assistant Professor, ISE.

Name of Activity Organized	Value added Course
Title of Activity	Aptitude & Soft Skills
Program Co-Coordinator	Prof. Vani
Date of commencement	16/10/2023
Date of Completion	20/10/2023
Place of Activity	CSE Seminar Hall
Course Coordinator and Expert	Prof. Vani and Mrs Vanitha
Summary of the Activity	The Value-added course for the third year students during the Academic Year 2023-24 was successfully organized. The course on ‘Aptitude & Soft Skills’ was aimed to understand the basics of the ‘Aptitude & Soft Skills’ and apply basics concepts and fundamentals for solving the examples in competitive examinations for Third students.

Sub: Regarding Permission to conduct a Value – Added Course

Respected Sir,

We would like to conduct a Value-Added Course on “**Advanced Entrepreneurship Skills**” for final year students from 16/10/2023 to 20/10/2023. This course aims to bridge the industry-academia gap by providing content directly aligned with industry needs. By focusing on developing innovative thinking, strategic planning, and effective problem-solving skills, students will be better equipped to launch and manage successful ventures. We kindly request your permission to conduct this course.

Yours Sincerely

Dr. Sowmya Naik P T

ABOUT COLLEGE

City Engineering College, Bangalore affiliated to Visvesvaraya Technological University (VTU) is centrally located in Bangalore. The College has expanded over the last 19 years with sophisticated infrastructure as a part of the Institution's commitment to provide higher quality education in the area of Engineering. The highly facilitated landmark building – provides a perfect ambience for creativity and learning. City Engineering College is known for its academic excellence, friendly welcoming atmosphere and community spirit. Over large number of full time students study here in a wide range of programs. It is a centre of talented, experienced teachers who inspire and energize the students to achieve the best.

About The Department

The Department of Computer Science & Engineering was started in the year 2001 is known for imparting Quality education and carrying out cutting edge research. In addition to the UG program, PG CSE program and Research facilities for Ph.D. The department offers undergraduate program and has a comprehensive curriculum on topics related to software and hardware with an emphasis on theoretical and practical learning. It has well equipped, state of the art laboratories supported by highspeed Internet and wireless networks.

About the Course

The "Advanced Entrepreneurship Skills" course is a meticulously designed value-added program aimed at bridging the significant gap between industry requirements and academic curricula. Tailored specifically for final year students, this course provides a robust foundation in entrepreneurial skills that are essential for the modern business landscape. By focusing on the development of innovative thinking, strategic planning, and effective problem-solving abilities, this program ensures that students are well-prepared to navigate the complexities of launching and managing successful ventures.

Course Outcomes

- Enhanced Entrepreneurial Mindset
- Comprehensive Business Planning

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING VALUE ADDED COURSE SYLLABUS

Course Name: Advanced Entrepreneurship Skills

Duration: 30 hours

Course Objectives:

- **Understanding Entrepreneurship:** Gain a deep understanding of entrepreneurship principles, including its definitions, historical evolution, and contemporary relevance in global economies.
- **Ideation and Opportunity Recognition:** Develop skills to generate innovative business ideas, assess market opportunities, and identify viable niches for entrepreneurial ventures.
- **Business Planning and Strategy:** Learn to create comprehensive business plans, develop effective business models, and strategize for sustainable growth and competitive advantage.
- **Marketing and Sales Mastery:** Acquire knowledge and practical skills in marketing strategies, digital marketing techniques, and sales methodologies essential for startup success.
- **Financial Management:** Understand financial planning, budgeting, and financial analysis for startups, including funding options and investment strategies.

Course content:

Module 1: Introduction to Entrepreneurship(6)

The first Module begins with an overview of entrepreneurship, exploring its definitions, historical context, and evolution in contemporary business landscapes. Students delve into the entrepreneurial mindset, focusing on essential qualities and attitudes necessary for success in entrepreneurial ventures. Practical sessions involve ideation and opportunity recognition, where students learn techniques to generate business ideas, assess market needs, and identify viable opportunities through case studies of notable entrepreneurial successes.

Module 2: Business Planning and Strategy (6)

Module two shifts focus to business planning and strategic development. Students learn about various business models and their applications, with a detailed exploration of creating a business model canvas tailored to startup contexts. Strategic planning sessions cover SWOT analysis, strategic decision-making processes, and setting SMART goals essential for guiding entrepreneurial ventures towards sustainable growth and success.

Module 3: Marketing and Sales (6)

The third Module concentrates on marketing strategies crucial for startup success. Students gain insights into fundamental marketing concepts and their roles in entrepreneurial ventures. Practical workshops guide students through developing comprehensive marketing plans, including market segmentation, targeting strategies, and effective positioning techniques. Additionally, sessions on digital marketing and social media strategies equip students with tools to leverage digital platforms for brand visibility and customer engagement. Sales techniques and customer acquisition strategies are also explored, emphasizing building and managing customer relationships critical for startup growth.

Module 4: Financial Management and Legal Considerations (6)

Financial management takes center stage on Module four, covering essential topics such as financial planning, budgeting, and financial projections tailored to startup finances. Students explore various funding options available to startups, including bootstrapping, angel investment, and venture capital, understanding their implications and strategic applications. Legal considerations in entrepreneurship are also addressed, covering business structures, intellectual property protection, and compliance with regulatory frameworks essential for ensuring legal and ethical business operations.

Module 5: Entrepreneurial Leadership and Growth Strategies(6)

The final Module focuses on entrepreneurial leadership and strategies for sustainable growth. Students delve into the traits of successful entrepreneurial leaders, learning how to cultivate leadership skills necessary for guiding teams and fostering innovation within startup environments. Sessions on scaling strategies provide insights into managing growth challenges, identifying opportunities, and devising effective scaling plans. Discussions on exit strategies and succession planning equip students with knowledge on managing transitions and ensuring long term sustainability for entrepreneurial ventures.

Value Added Course “Advanced Entrepreneurship Skills”

Resource Person Profile

K. Jaideep is a professional with over 7 years of experience in a broad range of areas including e-learning development, business, personality development, entrepreneurship, and digital marketing. He has a strong background in quantitative aptitude, logical reasoning, soft skills, and technical training. Jaideep is proficient in English, Kannada, Telugu, and Hindi, with an exceptional command of English and Kannada.

His expertise includes a deep knowledge of general math, reasoning, and quantitative ability, with strong analytical and problem-solving skills. Jaideep's communication and presentation skills are excellent, and he has a demonstrated ability to follow and deliver instructions effectively.

Jaideep has worked as an Aptitude Trainer since 2015, preparing students for various tests, conducting personality development training, and providing weekend sessions for parttime students. He has also served as a Freelance SME consultant, skill trainer, and facilitator, working with organizations to develop CSR proposals and supporting the hiring and training of sales teams. In addition, he has experience in business development, managing teams, and identifying new business opportunities.

Jaideep's achievements include nominations for "Best Trainer of the Year," publication of an article on the Indian Job market, and participation in Microsoft's Student Partner program and National Skill Development programs. He holds a Bachelor of Engineering in Electronics and Communication from Vellore Institute of Technology.

In his personal time, Jaideep enjoys reading books, fostering animals, and singing.

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

VALUE ADDED COURSE

A five-day Value-Added Course on **Advanced Entrepreneurship Skills** was organized by the Department of Computer Science and Engineering from 16th to 20th October 2023 for Computer Science and Engineering students in the seminar hall by K Jaideep, Manager, Business Development (Techno Kraft Centre for Learning).

Day 1:

The event began with a formal inaugural function. **Dr. Thippeswamy H N, Principal CEC and HOD of CSE** were present during the inauguration. The program began by seeking the blessings of Almighty with invocation and lighting of lamp. Principal advised the students to utilize the benefits of the course completely. **Dr. Sowmya Naik P T** welcomed the resource person and gave a course overview. Later the session was handed over to the speaker.

Introduction to Entrepreneurship

The course began with an overview of entrepreneurship, exploring its historical evolution and defining characteristics. Students engaged in discussions to understand the entrepreneurial mindset and the essential qualities needed for startup success. Practical exercises focused on ideation and opportunity recognition, where students generated business ideas and evaluated market opportunities through case studies of successful ventures.

Day 2: Business Planning and Strategy

Day two emphasized business planning and strategic development. Students delved into creating effective business models tailored to startup contexts, learning to use tools like the business model canvas. Strategic planning sessions involved SWOT analysis and goalsetting exercises to align entrepreneurial visions with practical business strategies, ensuring clarity and direction for future ventures.

Day 3: Marketing and Sales

These sessions equipped students with persuasive selling techniques and customer acquisition strategies crucial for gaining traction in competitive markets.

Day 4: Financial Management and Legal Considerations

Financial management took center stage on day four, covering topics such as financial planning, budgeting, and funding options available to startups. Practical exercises included creating financial projections and understanding the implications of different funding sources like angel investors and venture capital. Legal sessions addressed business structures, intellectual property rights, and compliance with regulatory frameworks, ensuring students understood the legal landscape of entrepreneurship.

Day 5: Leadership and Growth Strategies

The final day focused on leadership development and growth strategies for startups. Students learned about effective leadership traits and team management skills necessary for fostering innovation and creating a positive organizational culture. Discussions on scaling strategies and exit planning provided insights into managing growth challenges and preparing for future expansion or transition phases in entrepreneurial journeys.

Throughout the course, students participated in interactive sessions, case studies, and practical exercises designed to simulate real world entrepreneurial scenarios. By the end of the program, participants had gained comprehensive knowledge and practical skills essential for launching and managing successful startups in dynamic business environments.
